

<p>Level 6: My child is a full time wheelchair user. They can self wheel and are unable to use their legs functionally for standing/ walking (e.g., some forms of spina bifida, spinal cord injury).</p>	
<p>Level 5: My child has difficulty sitting on their own and controlling their head and body posture in most positions and has difficulty achieving voluntary control of movement and needs a specially supportive chair to sit comfortably and has to be lifted or hoisted by another person to move</p>	
<p>Level 4: My child can sit on their own but does not stand or walk without significant support and therefore relies mostly on wheelchair at home, school and in the community and often needs extra body / trunk support to improve arm and hand function and may achieve self-mobility using a powered wheelchair</p>	
<p>Level 3: My child can stand on their own and walks using a walking aid (such as a walker, crutches, canes, etc.) and finds it difficult to climb stairs or walk on uneven surfaces and may use a wheelchair when travelling for long distances or in crowds</p>	
<p>Level 2: My child can walk on their own without using walking aids, but needs to hold the handrail when going up or down stairs and often finds it difficult to walk on uneven surfaces, slopes or in crowds</p>	
<p>Level 1: My child can walk on their own without using walking aids, and can go up or down stairs without needing to hold the handrail and walks wherever they want to go (including uneven surfaces, slopes or in crowds) and can run and jump although their speed, balance, and coordination may be slightly limited</p>
